

EMU IS AMONG THE WORLD'S BEST AT AREAS OF BUSINESS AND FINANCE

THE WORLD UNIVERSITY RANKINGS

PROFESSIONAL JOBS SUMMITS RANKINGS STUDENT ABOUT US

World University Rankings 2019 by subject: business and economics

The 2019 Times Higher Education World University Rankings table for business and economics subjects uses the same rigorous and balanced range of 13 performance indicators as the overall World University Rankings, but the methodology has been recalibrated to suit the individual fields.

It highlights the universities that are leading across business and management, accounting and finance, and economics and econometrics subjects.

Eastern Mediterranean University is given a place by the Times Higher Education (THE) among the world's top 201-250 reliable institutions (in the field of 'Business and Finance) in World University Rankings. The best university across the world, in the field of Business and Finance, was Massachusetts Institute of Technology (MIT) that outranked last year's winner; Stanford University from the U.S.A. Turkish Republic of Northern Cyprus's (TRNC) EMU was given first place among the Turkish universities. Turkey's universities that made it among the top 500

were Bilkent, Boğaziçi and ODTÜ respectively. The Greek Cypriot Administration of Southern Cyprus (GCASC) reacted to EMU's acceptance among international rankings and statements were made concerning the protests to be made by GCASC's publishers and England. During this year's rankings, TRNC's state university EMU outranked GCASC's state university, University of Cyprus.

"The Results Have Filled Us with Great Pride"

During their evaluation in the field of 'Business and Finance', THE considers published

references, sectorial incomes, internationalisation, research and education. Elsevier Publishing's Scopus database is used for reference and research evaluation. EMU Rector Prof. Dr. Necdet Osam, especially emphasising on the fact that EMU is a developed institution with published references and internationalisation, said that the results filled them with great pride. Prof. Dr. Osam underlined the importance for universities to go beyond than simply aiding its students in getting a profession; but also in being institutions that can educate able students who can adapt and compete globally

in fields that do not currently exist here. He said that this can only be achieved by an institutional culture based on constant research, prioritised development, free-thinking academics/students and innovation. Prof. Dr. Osam said that this is an achievement for the entire TRNC; he thanked the devoted EMU family and the general public who, despite the forced isolation and political unrecognition of TRNC, managed to form and develop a world-renowned university in Cyprus.

EMU WAS REPRESENTED IN MALTA

Eastern Mediterranean University (EMU) was represented at the Annual Council Meeting of the Community of Mediterranean Universities (CMU) held in Malta on 24 – 26 October, 2018. EMU Rector Prof. Dr. Necdet Osam and Prof. Dr. Halit Tanju Besler (Vice-Rector: Academic Affairs) attended the meeting. During the Council meeting held at Malta University, Malta's only

public university, a workshop was also held with the title 'Environmental Education: A Challenge for Higher Education Institutions'. CMU incorporates 17 universities from Turkey and 2 universities from the Greek Administration of Southern Cyprus. EMU is the only representative from the TRNC within this organisation.

EMU RECTOR'S OFFICE MAKES STATEMENT ABOUT THE OVERPASS

The overpass is scheduled for employment on Saturday

The overpass connecting the Northern and Southern campuses of the Eastern Mediterranean University is planned to be brought back into service on October 27th, 2018 Saturday. According to the statement from EMU Rector's Office, the overpass on the Nicosia – Famagusta old main road, connecting the Southern and Northern campuses, was first put in service by EMU in the year 1999 to ensure safe passage and was damaged by a vehicle belonging to a construction company several months ago;

thus, was closed for service. According to the statement, the insurance agency, to which the construction company is registered to, was contacted. However, due to a disagreement of the insurance company concerning whether the overpass belongs to TRNC Highway Authorities or the EMU, the reconstruction expenses were not covered; resulting in delays of its re-employment. The statement, emphasising on the importance of student safety for EMU, included information about EMU covering the reconstruction expenses of the overpass to avoid further distress caused by

its absence to both the general public and the students. All the necessary procedures required by the Tendering Laws were completed and all the necessary steps for the re-employment of the overpass are now taken. The statement included indications of the precautions taken by the EMU to prevent delays and to ensure safety while the overpass was out of service. The statement also included EMU's apologies to the general public and students for the inconveniences that may have occurred during the absence of the overpass. The reconstructed overpass will be assembled on October 27th

2018, Saturday on 08:00 a.m. Therefore, passengers travelling from Nicosia and the Large Industrial Zone to Famagusta will enter the campus through the opening near the overpass and exit through the Sabancı gate. Those travelling from Famagusta to Nicosia and the Large Industrial Zone will pass the bus stop across the Sabancı Dormitory, go through the Southern Campus and re-enter the Nicosia Main Road via the bridge in front of the Faculty of Pharmacy. The regular traffic flow will resume following the completion of the installation.

EMU PROVIDES SCHOLARSHIP AND CASH CHEQUE FOR "MEDITERRANEAN SHARK" TEAM

Eastern Mediterranean University (EMU) has granted a scholarship and a cash cheque for the members of "Mediterranean Shark" team upon the successful achievements of the electric car designed by Electric Vehicle Development Centre (EVDC). The team received their awards

at a lunch organisation which took place at EMU Beach Club on Monday, the 22nd of October 2018 at 12:00 p.m. EMU Rector Prof. Dr. Necdet Osam, Vice Rector for Academic Affairs Prof. Dr. Halit Tanju Besler, Vice Rector for International Affairs and Promotion Prof. Dr. Cem

Tanova, EVDC President and Project Coordinator Assist. Prof. Dr. Davut Solyalı and the student members of the "Mediterranean Shark" team were amongst the attendees of the event. EMU Rector Prof. Dr. Osam stated that he is proud of the team's success and promised that the University will keep supporting similar projects. At the end of his address, Prof. Dr. Osam wished the team further success.

Within Top 10

Mediterranean Shark car managed to make it to the top 10 at Elektromobil 2018 Finals organized by the Scientific and Technological Research Council

of Turkey (TÜBİTAK). The team participated in the event under the name of "ADA Team" comprised of EMU Faculty of Engineering students. It is worth mentioning that EMU was the only team from the Turkish Republic of Northern Cyprus (TRNC) to participate in the said event. The dynamic driving and technical controls took place between the 7th and 9th of August 2018 and the Mediterranean Shark vehicle passed the test on the first try. Only 46 out of 86 cars made it to the finals and the ADA Team successfully completed the race in top 10 and became the team which received the least penalty points.

EMU VISUAL ARTS AND VISUAL COMMUNICATION DESIGN DEPARTMENT VISITED PRESIDENT AKINCI

Eastern Mediterranean University (EMU) Faculty of Communication, Department of Visual Arts and Visual Communication Design Chair Assoc. Prof. Dr. Senih Çavuşoğlu and Vice Chair Assist. Prof. Dr. Fırat Tüzünkan visited President of the Turkish Republic of Northern Cyprus (TRNC) Mustafa Akıncı at his office on Thursday, the 25th of October 2018. Assoc. Prof. Dr. Çavuşoğlu presented President Akıncı the catalogue of a project undertaken by EMU and participated by academicians, artists and designers from 13 universities

and 12 countries. Assoc. Prof. Dr. Çavuşoğlu invited President Akıncı to the opening of the exhibition. President Akıncı thanked for the invitation and underlined the universal power of work in academy and arts. President Akıncı wished good luck to EMU for carrying out a project as such. The first of the exhibitions where universities from TRNC, China, Poland, Turkey, Iran, USA, Mexico, Korea, Kosovo, Romania, Bosnia Herzegovina and France will be launched in the TRNC and then continue with the remaining participating countries.

PREPARATIONS CONTINUE FOR EMU INTERNATIONAL PEACE CONFERENCE

Eastern Mediterranean University's (EMU) Faculty of Communication and the Center for Research and Communication for Peace (CRCP) continues their preparations for the 5th International Communication and Media Studies Conference to be held on 8 – 9 November, 2018. The application deadline for those who wish to present their assertions is October 22nd, 2018 (<http://crcp.emu.edu.tr>). The conference, to be held at the Rauf Raif Denktaş Culture and Congress Center, Famagusta, will host several academicians from North Cyprus, Turkey and the World.

said that the preparations for the international peace conference are successfully ongoing and all EMU divisions are giving their support. Giving special thanks to the EMU Rectorate for their support, Assoc. Prof. Dr. Ersoy said that the conference will include topics such as 'Peace Communication', 'Political Communication', 'Crisis Management', 'Immigrant and Minority Rights'. Also, several participants from different discipline fields will present their assertions in panels to be held in both Turkish and English.

CRCP Extends Invitation to the Prime Minister

CRCP President, Assoc. Prof. Metin Ersoy and the Vice-President, Assist. Prof. Nilüfer Türksoy, paid a visit to the TRNC Prime Minister Tufan Erhürman in his office and extended him an invitation for the 5th International Communication and Media Studies Conference. After providing information about their work CRCP, Assoc. Prof. Dr. Ersoy said that the center, founded in 2007, organises many different events but the

Appreciation of the EMU Rectorate

According to the information from EMU Public Relations and the Press Office Directorate, the main guest speakers of the conference (with the theme "Think Peace, Speak Peace, Make Peace") will be Uppsala University Lecturer Prof. Dr. Nico Carpentier and Cardiff University Lecturer Prof. Dr. Stuart Allan. In his speech, Assoc. Prof. Dr. Metin Ersoy

most important of these is the international peace conference.

Non-Governmental Organisations (NGOs) Are Also Invited

In his statement, Assoc. Prof. Dr. Ersoy provided information about the preparations concerning the international peace conference and underlined that they will begin having

meetings with non-governmental organisations which are active within this scope. Emphasising the importance for non-governmental organisations to be involved in such conferences, Assoc. Prof. Dr. Ersoy said that the NGO representatives will contribute during this conference in which, the concept of 'peace' will be thoroughly discussed.

RADIATION WAS DISCUSSED AT EMU

Eastern Mediterranean University (EMU) Faculty of Health Sciences and Turkish Cypriot Radiographers' Association collaboratively held the "Radiation Protection and Radiation Safety Symposium" on October 20, 2018, Saturday (10:00 – 16:00) at EMU Mustafa Afşin Ersoy Auditorium with 150 participants. The opening speeches of the symposium were given by Prof. Dr. Sonuç Zorlu Oğurlu (Vice-Rector: Student Affairs) Prof. Dr. Mehtap Malkoç (Dean at Faculty of Health Sciences) and Rad. Tech. Songül Bahar. Songül Bahar said that like many other fields, in the medicine and health, it is impossible to provide sufficient and quality service to the public without education. She emphasised the enabling nature of congress and symposiums in following the latest scientific and technological renovations. In her speech, during the conference held with the collaboration of EMU Faculty of Health Sciences, Bahar extended her gratitude to EMU and everyone who contributed to the symposium. At the end of her speech, she wished for the symposium to be scientifically beneficial for the participants. In her statement, Prof. Dr. Mehtap Malkoç said that all living and non-living things are exposed to radiation; both by natural ways such as air, water and earth, and even the radiation emitting from their own bodies, and by artificial radiation sources. Prof. Dr. Malkoç also said that the use of

radiation in the diagnosis, treatment and research fields brings forward the concept of radiation safety. Prof. Dr. Malkoç also thanked all the EMU academic and administrative personnel and members of the Turkish Cypriot Radiographers' Association for their contributions. During her speech, Prof. Dr. Sonuç Zorlu Oğurlu (Vice Rector: Student Affairs) said that radiation is part of our lives and despite the awareness concerning medical radiation, everyone is exposed to the radiation emitted by technological devices all day long. Saying that this symposium will be very beneficial for informing the public on radiation safety, Prof. Dr. Oğurlu on behalf of EMU, expressed their happiness in hosting such a symposium. The first session of the symposium included Assist. Prof. Dr. Ayşegül Yurt's (from Dokuz Eylül University) presentation titled "What is Radiation? How is it measured? What are the basic criteria for Radiation Protection?" and Dr. Fuat Türköz Çiner's (from Dr. Burhan Nalbantoğlu Hospital) presentation titled "Biological Effects of Ionising Radiation". The session moderators were Prof. Dr. Mehtap Malkoç (Faculty of Health Sciences, Dean) and Rad. Tech. Songül Bahar.

All Health Radiation Related Topics Were Discussed

The second session of the symposium was moderated by Assist. Prof. Dr. Gülten Sucu Dağ (Vice - Dean at the Faculty of Health Sciences) and

Rad. Tech. Adem Abiç. During the second session, Süreyya Vudalı (M.D. at Cyprus Central Hospital) presented "Radiological Diagnosis Systems and Risk Evaluation" and "Radiological Treatment Systems and Risk Evaluation" was presented by Assist. Prof. Dr. Nina Tuncel from Akdeniz University. During the session moderated by Prof. Dr. Doğan Bor (from Ankara University), and Assist. Prof. Dr. Ayşegül Yurt (from Dokuz Eylül University), Prof. Dr. Ahmet Bozkurt from Akdeniz University gave a speech titled "Implications for Health-care Employee Protection and Solution Proposals". Prof. Dr. Doğan Bor moderated the panel after the conclusion of the conference. During the panel titled "National Substructure Policies and Solution Proposals in Radiation Protection from Ionising Radiation Sources", Nezaket Özgür from TMRT-DER, Head of Radiographers' Association Rad Tech. Songül Gülbahar and Rad. Tech. Mehmet Bölüm each gave speeches. Nezaket Özgür from TMRT-DER, Head of Radiographers' Association Rad Tech. Nezaket Özgür from TMRT-DER, Head of Radiographers' Association Rad Tech. Songül Gülbahar both gave speeches during the panel titled "Personal Benefits Panel Interactive Session" moderated by Assist. Prof. Dr. Seray Kabaran (Vice-Dean at EMU Faculty of Health Sciences).

EMU DR. FAZIL KÜÇÜK FACULTY OF MEDICINE GIVES SEMINAR AT GMTMK

Eastern Mediterranean University (EMU) Dr. Fazil Küçük Faculty of Medicine Faculty Member Op. Dr. Didem Rıfki, gave a seminar to the Gazimağusa Türk Maarif Koleji (GMTMK) Students. The seminar titled 'Upper Respiratory Infections and the Importance of Hand-Washing' was held within the scope of the public awareness in the medicinal field events. Op. Dr. Rıfki, drew attention to the importance of a cost-free and the most effective

method of preventing the contamination of germs: hand-washing; especially in the upcoming winter period in which infections like cold or flu are more likely to emerge. As an Ear, Nose and Throat (ENT) and Head-Neck Surgeon, she said that informing the public about the commonly encountered diseases is more important than performing tens of surgeries or examining hundreds of patients at the polyclinic.

"A Student Who Is Ill Should Rest at Home"

Op. Dr. Rıfki said that giving the start to these public health seminars at schools was not a coincidence: "As everyone knows, most upper respiratory infections spread very quickly. One reason for this is that we have to share crowded and closed environments with other people. In present-day conditions, a student who is ill should rest at home, and to prevent contamination, wash their hands and not share their

personal belongings with others". Also, Op. Dr. Rıfki drew attention on the necessity for the right follow up and treatment of upper respiratory diseases since it is extremely important for preventing a possible antibiotic resistance. Op. Dr. Rıfki answered frequently asked questions concerning throat cultures, rheumatic heart disease and flu vaccines. She explained that these seminars and similar school visits will continue.

EMU FACULTY OF COMMUNICATION GIVES SUPPORT TO HELP THOSE WITH CANCER ASSOCIATION

Eastern Mediterranean University (EMU) Community Involvement Center adds a new social responsibility project under its roof. Genesis IMC Agency, a division of EMU Faculty of Communication, Department of Public Relations and Advertising, counselled by Assoc. Prof. Dr. Anıl Kemal Kaya and coordinated by Res. Assist. Mürüde Özen, has implemented a social responsibility project in order to provide support to the Help

ThosewithCancerAssociation. The project, with the motto "Raising Awareness and Giving Support", collected two parcels of shoes and eight parcels of clothing at the stands set up within the EMU campus. The shoes and clothes collected over the campaign, supported by many caring people from the EMU, were delivered to Yıldız Yaman, in charge of the Famagusta branch of Help Those with Cancer Association. Afterwards, Raziye Kocaismail, President

of the Association, thanked the EMU family and students for supporting the project and

underlined the importance for carryingoutsimilarmeaningful projects to raise awareness.

EMU DEPARTMENT OF NURSING'S BREAST CANCER AWARENESS EVENT

Eastern Mediterranean University (EMU) Faculty of Health Sciences, Department of Nursing held Breast Cancer Awareness Events on October 24th 2018, Wednesday between 12:00 and 14:00 at EMU Atatürk Square, and on October 25th 2018, Thursday (12:00) at Famagusta Municipality Market-Square. Members and students of the Faculty of Health Sciences, Department of Nursing, issued a statement about the events organised due to October Breast Cancer Awareness Month.

The Importance of Early Diagnosis Was Underlined

The statement included the following: “Breast cancer is the most common form of cancer among women and it is seen in every one of eight women around the world. Among women suffering from this disease, the mortality rate is one in four. However, despite being very common, breast cancer also has a very high treatment rate with early diagnosis. Here, we aim to draw attention to the importance of early diagnosis and scanning and also to raise awareness among women concerning breast cancer prevalence, risk factors, symptoms and scanning methods. Mammography, being the gold standard method for

scanning, is performed in the new division in service at Dr. Burhan Nalbantoğlu State Hospital, free of charge. Mammography is especially recommended for women over 40; however, women over 20 should self-palpate monthly. Clinical breast examinations done by surgical experts are also among the important early diagnosis methods. Women who are over 55, with family members who have a history of breast cancer, those with tense breast tissue and genetic susceptibility, the ones who had their first period later than usual or those who go into early menopause, women who never gave birth and those who have

used hormone replacements for over two years are within the risk group. The medical situation of such individuals needs to be followed closely. One in every hundred men also suffers from breast cancer and men with a first-rate relative who has been diagnosed should also get regular examinations. For avoiding breast cancer, it is important to stay away from smoking and alcohol, exercise regularly, to have a healthy diet and to undergo the utmost minimum of a Hormone Replacement Treatment for it increases the risks for post-menopause weight gain and breast cancer”.

PROF. DR. GÜLLÜOĞLU, LECTURER AT EMU'S DR. FAZIL KÜÇÜK FACULTY OF MEDICINE, EXPLAINS THE UNKNOWN ABOUT BREAST CANCER

Prof. Dr. Bahadır Güllüoğlu, lecturer at Eastern Mediterranean University's (EMU) Dr. Fazıl Küçük Faculty of Medicine, is also the owner of the following titles: Member of the Turkish Surgical Association, International Society of Surgery (ISS-SIC), International Association of Endocrine Surgeons (IAES), European Society of Breast Cancer Specialists (EUSOMA) and (American) National Consortium of Breast Centers (NCBC), founding co-president of Turkish-Bulgarian Endocrine and Breast Surgery Club and the founding co-coordinator of Endocrin Surgery Working Group, board member of Turkish Federation of Breast Diseases Associations, academic member of the American College of Surgeons; ACS, lecturer at Surgical Sciences Department of European Academy of Senology; EAoS, Düsseldorf, Germany, lecturer at MANOSMED Mediterranean Breast Sciences University (affiliated with Montpellier University Faculty of Medicine, France, and the European School of Oncology; ESO, Milano, Italy, vice-president at Senologic International Society; SIS, board member of European Board of Surgery; UEMS/EBSQ-Breast Surgery Division and Breast Surgery International/BSI, honorary member of Bulgarian Surgical Association and Romanian Breast Surgery and Oncology Association, member of St. Gallen International Breast Cancer Consensus Board, and International Breast and Gynaecologic Cancers (IBGCC) Consensus Panel and national/international author. Prof. Dr. Güllüoğlu, presented statements about breast cancer as per October Breast Cancer Awareness Month. Prof. Dr. Güllüoğlu stated that breast cancer is the most common form of cancer among women both from other countries and from Turkey; and continued: "Susceptibility among family background is very important. Those with a mother, aunt or a sister suffering from breast cancer have a higher risk rate. Furthermore, the more people of ones' family members suffer from breast cancer, the more that person is under risk. Firstly, if one is in the high risk group, they certainly should receive genetic consultancy. This is a process that includes the determining and inspection of the

last 3 generations of the individual's family tree. The necessity for a genetic test should be decided in accordance with the analysis results".

"Do Birth Control Pills Cause Breast Cancer?"

Prof. Dr. Güllüoğlu talked about the surgical removal of a disease-free breast and whether this would be a suggestible method: "If the individual is under high risk, such a surgery can be performed in order to reduce the risk rate. If breast cancer seems to be common among the family members, the individual should also be checked for ovarian cancer and their state should be supervised". If the ovarian cancer risks are high, it may be necessary to surgically remove both ovaries. Prof. Dr. Güllüoğlu pointed to the contradictory information circulating concerning the use of birth control pills and said: "There is no clear evidence that birth control pills cause cancer. We simply know that the intake of birth control pills increased the risk during the 70s. However, the current formula used for the pills are not defined as risk amplifiers.

"Healthy Women Should Also Get a Scanning"

Prof. Dr. Güllüoğlu touched the subjects of breast cancer scans and disease-free survival. He continued: "With early diagnosis, the survival rate at the disease's early stages is 98% for 5 years. This rate is 100% at stages 0 and I, and is 95% at stage II. Improvements have been recorded in stage III. However, in comparison to earlier stages, the rate is 10% or 15% lower.

"The Treatment Should Begin As Soon As Possible"

Prof. Dr. Güllüoğlu, during his statements on breast cancer scans said: "The first and most effective method is a getting mammography. The other is self-examination. Also, periodic examinations by doctors are among the suggested methods. After diagnosis, it is vital to start the treatment at once".

"It Can Spread To the Armpit"

After addressing the latest developments in breast cancer approaches, he continued: "The

treatment related improvements are mostly focused on decreasing surgical intervention. For example; with patients who have tumours so large that breast-conserving surgery is no longer an option, the patients can be given systemic treatment (chemotherapy, hormonal treatment) to decrease the tumour's size in order to avoid the removal of the entire breast. In half of the cases, depending on its type, the tumour can be completely eliminated. Prof. Dr. Güllüoğlu said that, in the last 5-6 years, cleaning surgeries are not performed for patients with cancer spread to their armpits (as long as the spread is limited). He said: "Instead, the patients are given no additional treatments, or they are given radiotherapy. Even better, the patients are firstly given chemotherapy. These developments both minimise the breast surgery, and help in avoiding the armpit cleaning surgery. These implications also help preserve the patient's quality of life. The most important development in radiotherapy is that the treatment period is been decreased. Radiotherapy, once given every 5-6 weeks, can now be given every 3 weeks. Apart from that, radiotherapy can also be given during the patient's

surgery, while she is still on the surgery table. It is applied to the area from where the cancer has now been removed. We call this Intraoperative Radiotherapy. Thus, the patient either receives no radiotherapy after the surgery or receives it for a shorter period than initially planned.

The Possibility of Additional Radiotherapy

Prof. Dr. Güllüoğlu said that treatment response, especially to medication, is determined by the cancer's biological properties. "These depend on as to whether oestrogen and progesterone hormone receptors exist in the body or on the existence and activity of proteins such as HER2 and Ki67. Also, the grading of the cancer cell, in order to determine the resemblance to a normal cell, affects the response to treatment. As still in the early stages the cancer may be, it can be imperative to remove the breast of a patient with multiple breast tumours. The replacement of the breast (silicone, or fat obtained from the stomach) depends on the subject's breast size, the smoking factor, additional coronary diseases, structure of the stomach and the possibility of receiving radiotherapy for cancer".

EMU MAKES STATEMENT ABOUT ACADEMIC AMNESTY

Eastern Mediterranean University (EMU) Institute of Graduate Studies and Research made a statement concerning the effectuated academic amnesty law published in the Turkish Republic of Northern Cyprus (TRNC) official gazette on October 12th, 2018. The statement indicated the enforcement of the law concerning the resuming of education for students (Temporary Laws) (Amendment) who used to study in a higher education institution (operational under the no. 65/2005 TRNC Higher Education Law) and whose studies were

terminated. The students under the following conditions will be able to submit their applications within a year of the law's enforcement: Students whose studies have been terminated at English Support Program or the Scientific Preparation Program stages. At course completion stage: Students whose studies have been terminated at the master's and PhD programs' course stage, termination of registration without reaching the legal maximum period of study, termination of registration due to unsuccessful performance,

failing to achieve the required CGPA, termination of registration for reaching the end of the legal duration of studies (including two extended semesters). Students whose studies have been terminated at Thesis / Project writing stage and students whose studies have been terminated at PhD Qualifying Exam stage.

For Detailed Information:

The students who wish to resume their studies during the following semesters must refer to EMU Student Affairs with an application by October 11th, 2019:

2018 - 2019 Fall Semester,
2018 - 2019 Spring Semester (classes begin in February) and 2019 - 2020 Fall Semester (classes begin in September). Detailed information can be obtained from the Institute of Graduate Studies and Research or the Student Affairs Directorate. The contact details of the departments are as follows:
Institute of Graduate Studies and Research: Tel: 0392 630 1157, Web: <http://grad.emu.edu.tr>
Student Affairs Directorate: Tel: 0392 630 1217, Web: <http://registrar.emu.edu.tr>
