

## 2nd Inter-Continental Concert (The Cyprus Station):

Inter-Continental Concerts follows two main goals as the essence of its existence: First, having international people, who are cooperating together, getting to know each other's' culture and root. (considering the fact that smoothness of music provides a great opportunity for this aim). Secondly, knowing that the beauty of cooperation and sympathy is a valuable humanitarian message, by representing it, Inter-Continental Concerts tends to motivate people to honor this message and spread it.

The title of this performance is "The Cyprus Station". It refers to the Island of Cyprus which is like a transit station that has provided the Inter-Continental Concerts team the opportunity of being connected to many different individuals from many different countries.

North Cyprus – 2013
